WILDWOOD
NURSERIES

RHODODENDRON
AZALEA
HARDY FERNS
AND
NATIVE PLANTS

BLOWING ROCK,
NORTH CAROLINA

General Information

THE WILDWOOD NURSERIES specialize in Native Rhododendron, Kalma, Azalea, Galax and hardy ferns. Our organization is a well established one, operating in the sections in which these plants are found in luxurious abundance.

Our stock is exceedingly large and well selected, specimen grades being supplied at what you would ordinarily pay for standard stock. This is due to the fact that we are right on the scene where the plants grow and therefore have a definite knowledge of every plant we sell. We are able to supply specimen quality in practically all the varieties listed on this price list. If you will specify your requirements we can figure on them for grades that are large and exceptional.

We employ experienced men only at Wildwood Nurseries, and in addition to this a member of the firm personally supervises the loading and packing of each car, to insure safe transit of each plant.

It is to your advantage to place your orders early, as we fill them in the order of their receipt. We reserve the right to cancel orders if financial reports prove unsatisfactory.

Cancellation of orders will not be accepted if work has been commenced unless you agree to accept the loss and pay us for work already done.

Shipments are F. O. B. our nurseries. We assume no responsibility for them after their acceptance by the transportation company. All claims for damage or delay must be made on receipt of goods.

Please advise us when shipments are received so that our efforts to trace can cease.
